The School Risk Register

Helping to make schools safer

A tailored tool to help school management prioritise
and manage the full spectrum of risk.

Looking at the whole risk picture

Save money, improve morale and produce safer schools

Our unique School Risk Register can help you to make your schools safer by highlighting your major risk areas. This will enable you to prioritise your risk management actions and will make allocating budgets faster, easier and more efficient.

Using the School Risk Register to identify and manage all of the risks your schools face also has other benefits. Effective risk management can reduce claims, creating the potential for financial savings through reduced premiums. And being seen to take strategic issues seriously can not only improve your schools' reputations, it can also lead to improved morale. Finally, the School Risk Register makes sure that staff and governors work together to recognise the risks facing the school and this added communication can prove to be of huge benefit to everyone.

Considering every factor

We created the School Risk Register to identify all of the many risks threatening the operational success of schools today. This is because there are far more threats than the obvious, insurable ones to consider. In fact, 80% of all risks are uninsurable. These include strategic risks such as:

- falling school rolls
- Government regulations (for example new curriculum, contact time)
- new financing proposals
- inspection
- inability to recruit in key areas
- social tensions.

How the School Risk Register works

Part 1 A two-part model in conjunction with your local authority

We will work with you to develop a model that meets your specific needs. We will base this around the following approach:

- a) Guidance document.
- b) A risk management model in a simple, downloadable spreadsheet format. Completing the spreadsheet will enable a school to clearly identify, manage and consider mitigation of their risks quickly and simply. Schools can download and populate this spreadsheet from your authority intranet site.

Part 2 Three awareness sessions for head teachers

Three half-day workshops that will enable head teachers to fully understand and benefit from the School Risk Register risk management process. This training enables staff to manage the risks and their implications throughout their organisation.

Zurich Municipal Risk Management is a team within Zurich Municipal of nearly 50 individuals. It specialises in risk management in the public sector with a particular focus on Local Government. Our risk management work with senior management teams developing strategic, partnership and project risk management approaches. Where necessary we can also call on individuals from within the wider global Zurich business to supplement our skills.
